

ICoTA Canada 'Innovation Award 2018' - Winner

"If you're in the legacy business, you're out of business. The dinosaurs fall off the map, and those who innovate really reap the benefits. You shift to where there is a convergence of cost, price, technology... Take control of disruption."

That was the message from Peter Tertzakian of ARC Energy Institute, keynote speaker of the ICoTA Canada 2018 Roundtable Program held on October 24th. Mr. Tertzakian conveyed ideas that perfectly describe InFocus' approach to technology development and later in the afternoon InFocus won the first-ever ICoTA Canada Innovation Award.

ICoTA (Intervention & Coiled Tubing Association – Canadian Chapter) and sponsor TSGI Corporation have recognized InFocus for our AMP: All Metal Power section technology. Acknowledgement by a panel of industry experts from ICoTA means a lot to the staff at InFocus, who have put a lot into the development and commercialization of our AMP technology.

Our sincere thanks to the Board of ICoTA and TSGI Corporation.

Michael Bosdet, President of TSGI Corporation presents the ICoTA Canada Innovation Award 2018 to Mark Luchak, COO of InFocus Energy Services Inc.

InFocus looks forward to future collaboration.
