

If you're going to be at SOLIDWORKS World in Dallas this year, Peter Kjellbotn of InFocus Energy Services - Engineering will be delivering a presentation on the **brand new** SOLIDWORKS/SIMULIA SSE product.

SIMULIA SSE allows users analyze their SOLIDWORKS models with the ABAQUS solver on the cloud through the 3D Experience platform. InFocus has been involved in a beta program of SIMULIA SSE for the last year, and SSE has provided InFocus engineering the ability to do perform really unique processes that they previously would not have been able to do with SOLIDWORKS alone.

Using
SOLIDWORKS
Structural Simulation
Engineer to Solve
Real-World Problems
